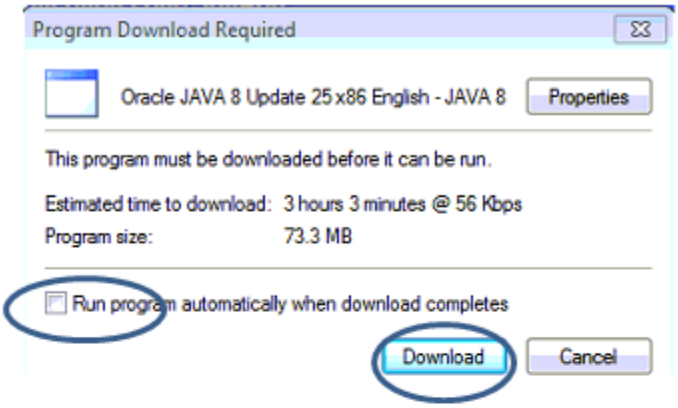
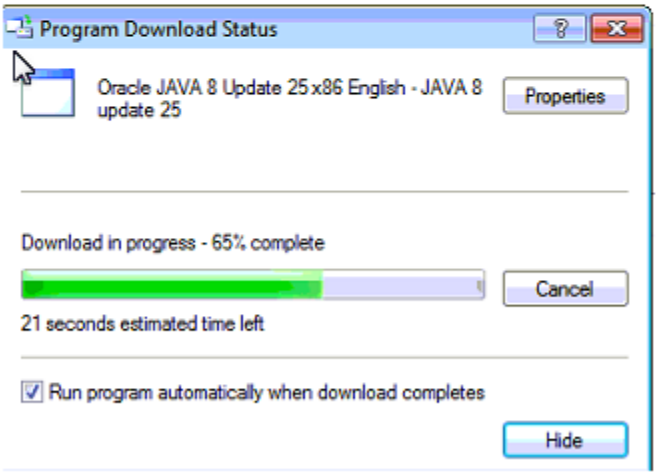
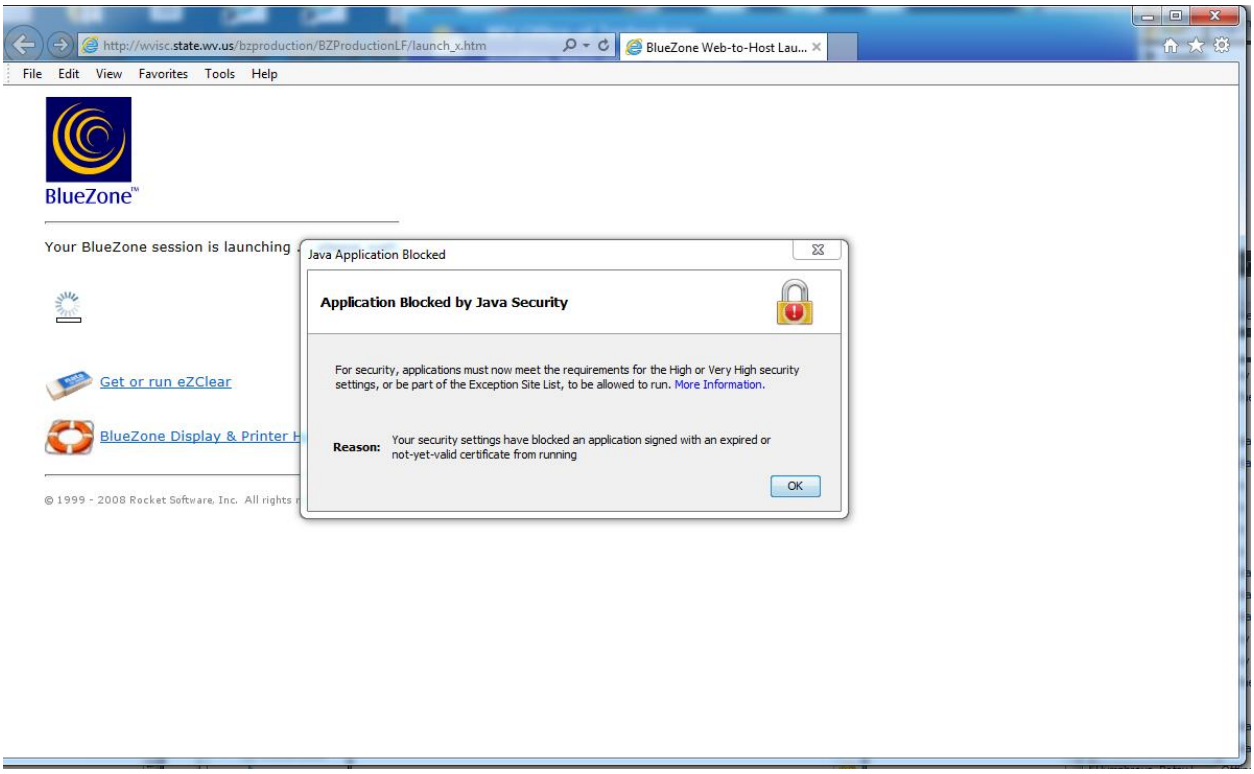
Run
Close

Put a check in Run program automatically when download completes and click Download



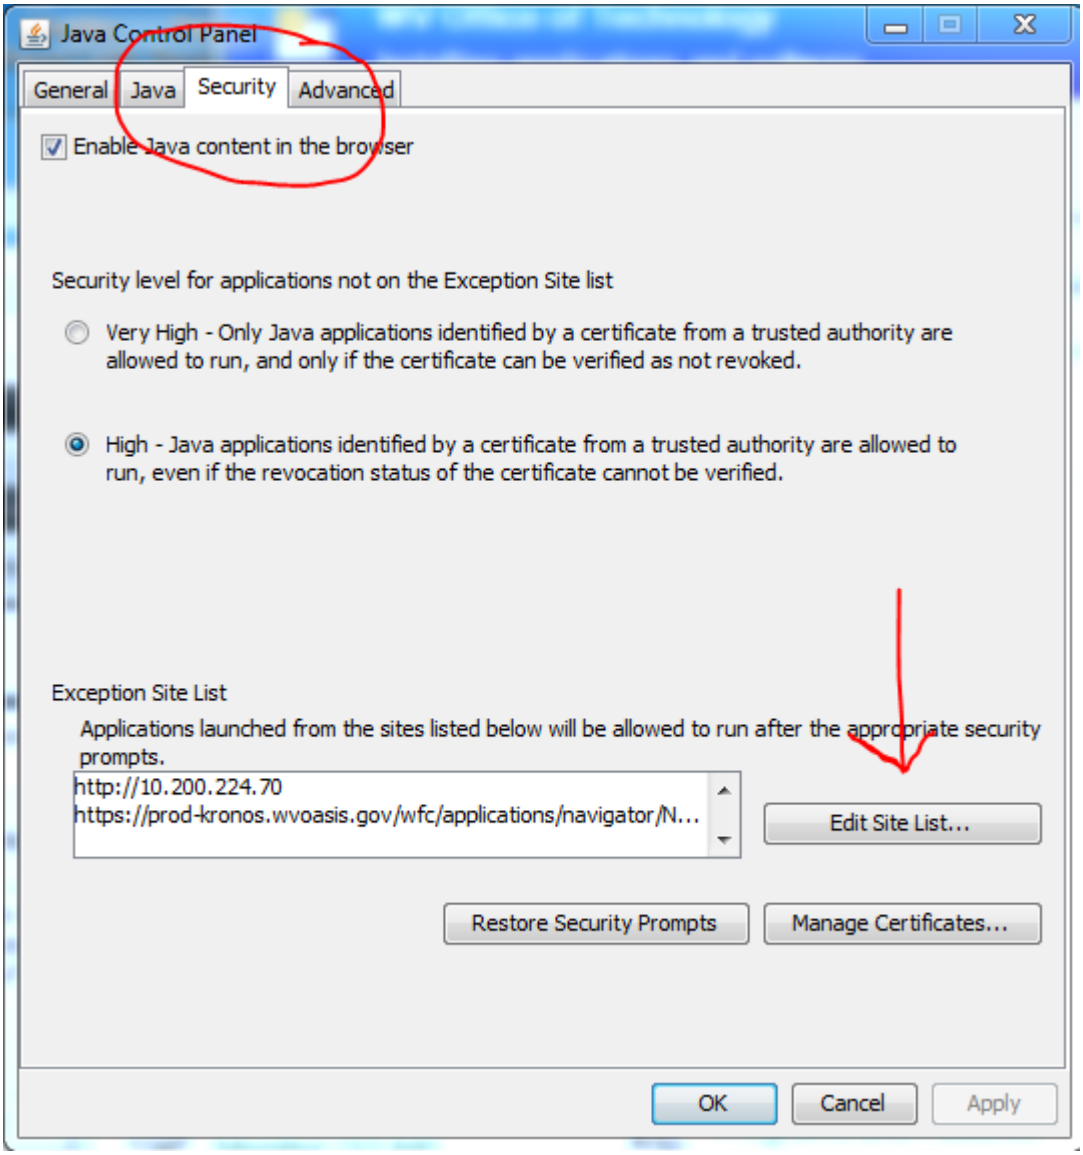


After the program completely finishes, try your application. If you are using Bluezone, you may get an error about security settings.



To fix this error, click on Start/Control Panel/Java

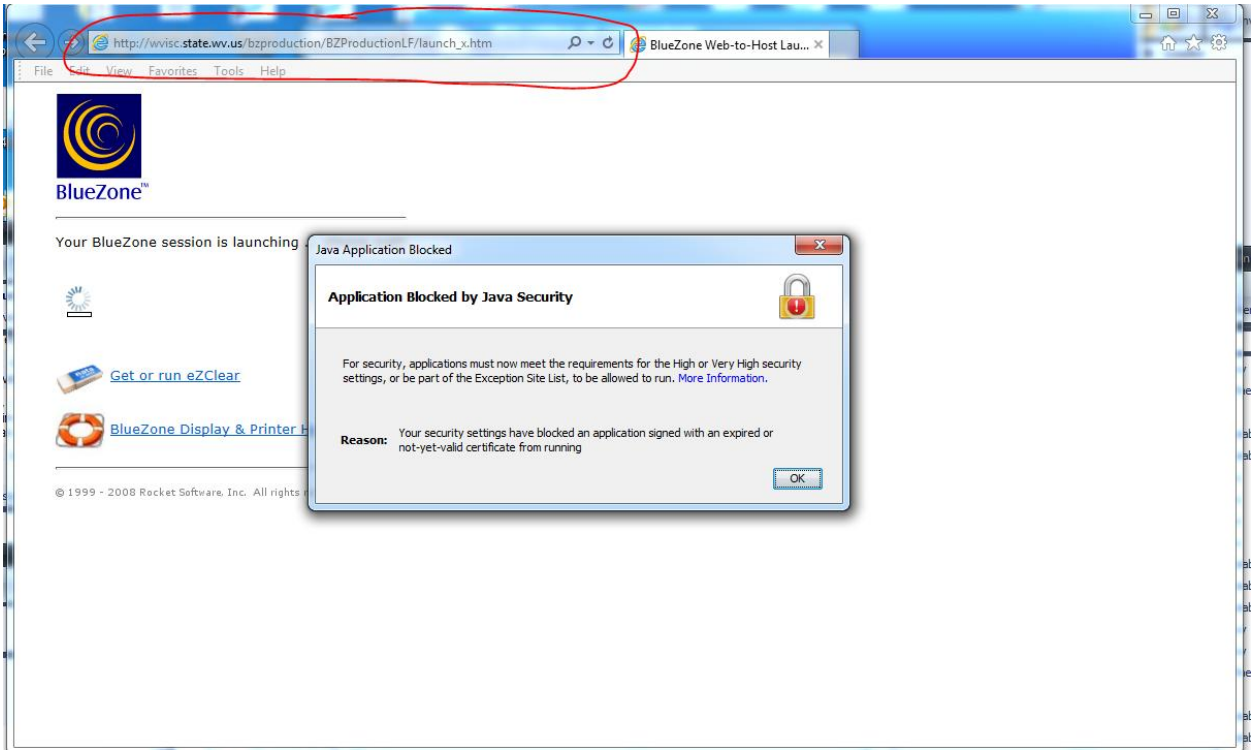
Click the Security Tab in the Java Control Panel then click Edit Site List.

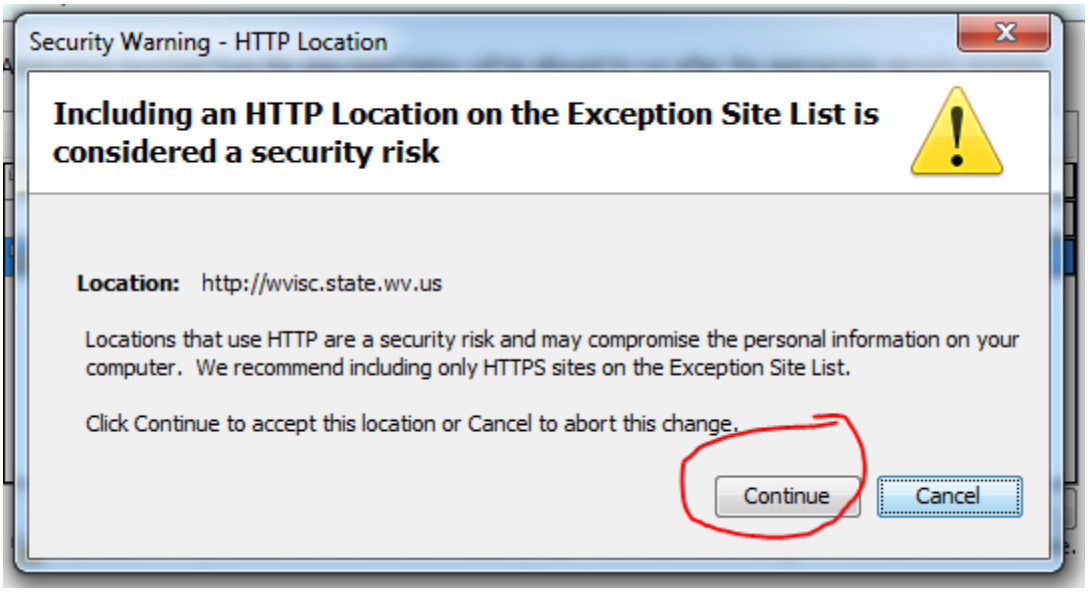


Copy the URL from the Bluezone page into the site list for Java Security by clicking on Add on the Exception Site List. Paste the URL into the site list. Click Continue on the Security Warning – HTTP Location.

IF YOU ARE A KRONOS USER, YOU MUST ALSO ADD https://*.wvoasis.gov to this list

Close all programs and web browsers and restart your program that required Java.





Security Warning - HTTP Location
Including an HTTP Location on the Exception Site List is considered a security risk
Location: http://wvisc.state.wv.us
Locations that use HTTP are a security risk and may compromise the personal information on your computer. We recommend including only HTTPS sites on the Exception Site List.
Click Continue to accept this location or Cancel to abort this change.
